

Sharkmon – feature & functions

sharkMon your workbench for your pcap data

- Tcpdump / tshark & capture appliances for importing pcap data
- Processing many files – 100, 1000s, can provide longtime reports
- Tshark syntax and filter = 10000ds of metrics
- Symptoms for thresholds, pattern matches, MAX/AVG or deviation
- large files over hours can be split into many smaller – providing statistics over time
- All data in Database – for months/years
- Collaboration and remote services via Web Gui
- Distributed Capture Agents (inProgress)

Topic	Description
Platform	<ul style="list-style-type: none"> • OS – Container • Cloud (3 versions depending on required functionality) • OnPremise
Access	<ul style="list-style-type: none"> • Web based Application • Multi User Platform • Per Web Browser (pref. GoogleChrome/Firefox)
Architecture	<ul style="list-style-type: none"> • Single instance (distributed agent in progress)
Data processing	<ul style="list-style-type: none"> • Network packets – PCAP Files • split files, trim packets, de-duplicate, merge, filter (shark-display filter)
Data sources / Import	<ul style="list-style-type: none"> • PCAP bulk upload (drag&drop) • PCAP FTP Stream • Capture Appliance (API access)
Data Volume	<ul style="list-style-type: none"> • Pcap File size up to 10GB • Up to 5.000 files • Data history – for 2 years • 1 second data history on demand / byRequest
Data Org	<ul style="list-style-type: none"> • Scenarios (data sources) • Profiles (metrics and aggregations) • Pcap Files
Analysis Org	<ul style="list-style-type: none"> • Categories (alignment of metrics to Network / Connection/ Application)
Analysis sides	<ul style="list-style-type: none"> • Single side (single scenario)

	<ul style="list-style-type: none"> • Multi side (multiple scenario - correlation) – allowing overlay of multiple perspective / views on single analysis
Analysis functions	<ul style="list-style-type: none"> • Symptoms (critical /warnings) - Each metric for each aggregation (see below) can compared against 2 thresholds
Metrics	<ul style="list-style-type: none"> • Each wireshark protocol / field: up to 200.000 metrics • User can define or request from INS metric / profiles for any field
Metric Value aggregation	<ul style="list-style-type: none"> • COUNT • MAX, AVG, MIN, SUM • DEVIATION • %PERCENT
Metric features	<ul style="list-style-type: none"> • Web Response Analysis • Per metric - Timing analysis • More on demand / in progress
Data dashboards	<ul style="list-style-type: none"> • Scenario overview – top Dashboard, longtime chart (only symptoms, only categories min. 5 minute- data) • Scenario view - one / multiple scenario, longtime Chart – symptoms and/or raw data) • Insight view – single pcap file, max 4 hours duration, min. 1 second granularity, all fields, categories, per-file analysis (timing)
Data Export	<ul style="list-style-type: none"> • Symptoms (critical / warning) – per metric - CSV Export • Single file Metrics – raw data metric CSV Export • Data export to SLIC (symptoms / Raw Values)
Reporting	<ul style="list-style-type: none"> • In combination with SLIC – KPI dashboard, history reporting – aggregation / correlation with other datasources like network/ System devices, cloud metrics etc.
